CAPABILITIES STATEMENT

BACKGROUND

B & B Solutions is a mission focused 8(a) Small Disadvantaged Business that can be best categorized in three major sectors; Facilities, Professional Services and Administrative Support Services.

While we got our start in the facilities sector, we have since expanded and now provide a host of complex facilities, professional and administrative support services to numerous Federal, State, Local, and Commercial clients. Some of our services include the management and tracking of Equal Employment Opportunity (EEO) investigations as well as the provision of extensive human resources support including, but not limited to, position description development and recruitment strategies and activities.

We also provide programmatic analysis for administrative and professional government offices and facilities, as well as executive assistant and office automation support. We provide training support in areas such as office protocols and procedures, lease compliance, and OSHA requirements in the workplace. Together with our administrative and professional support, we provide facilities support services that include logistics and custodial/janitorial solutions. Our facilities sector also consists of warehouse support, storage and interior upgrades including flooring, painting, furniture, and other interior services.
